PROFESSIONAL SUMMARY

M.Sc.UI/UX candidate with a 9.5 CGPA and a multidisciplinary background in technology,

PROJECTS

commerce, research, and digital productivity. Interested in product design and human–AI interaction, with experience in user interviews, usability evaluation, journey mapping, accessibility-focused design, and high-fidelity prototyping. Focused on translating user needs and research findings into clear, usable digital experiences.

Google Maps Accessibility Redesign

Conducted 20 user interviews and an accessibility audit; explored a revised icon system and developed a high-fidelity prototype to improve clarity and accessibility.

AI Companion for Older Adults

Concept for a conversational AI companion to help older adults complete smartphone tasks and use digital services more independently. Focus areas include accessible interaction, clear guidance, and user control.

R.A.M.UX Design System

Developing a reusable design system with organized foundations and interface components to support consistency and scalable UI design.

Food Delivery Research Study

Used UX research methods, journey mapping, and usability evaluation to identify user pain points and translate findings into redesign opportunities.

EXPERIENCE

Freelance Accounting & Financial Documentation
